- Clean water rinse option
- 3/4" water connection
- 75L or 100L capacity
- Possibility of integration with a managing computer (optional)
- Liquid level sensor (optional)

Mixer for powdered drugs and thick chemical substances

Thanks to the ability to time set, we can be sure that the water and medicine solution is properly mixed during the process of applying medicines to animals. Due to the stainless steel rotor, the foaming of the chemical is kept to a minimum. Mixing tank with a large filling opening for easy inspection and cleaning of drug or chemical residues.

CHEMICAL DILUTION RATE
